PROFESSIONAL SUMMARY

Highly motivated and detail-oriented Flutter Developer with 1.5 years of experience building scalable, high-performance cross-platform applications. Strongly focused on crafting intuitive, responsive UI designs and integrating RESTful APIs to deliver seamless user experiences. Experienced in implementing robust state management solutions using BLoC architecture to ensure maintainable and scalable codebases. Proficient in developing modular architectures, optimizing app performance, and collaborating with cross-functional teams to deliver feature-rich mobile applications. Passionate about clean UI design, structured code practices, and continuously improving application efficiency and usability.

PROFESSIONAL EXPERIENCE

Revolution Games Private Limited **Sept '24 – Feb '26**

Junior Software Engineer (Flutter developer)

- Gained hands-on experience in UI design and development using the Flutter framework and Dart programming language for building cross-platform applications.
- Integrated RESTful APIs to enhance application functionality and ensure seamless data communication between client and server.
- Developed and optimized responsive UI components using Flutter's widget system to deliver a smooth user experience across various devices and screen sizes.
- Implemented effective state management solutions using BLoC architecture to maintain scalability and code maintainability.
- Gained experience with Firebase, hosting web applications using Firebase Hosting.
- Collaborated with cross-functional team members to debug, resolve issues, and continuously improve overall application performance.

Virtusa **Jan '23 – Apr '23**

Intern-Delivery

- As an intern at Virtusa had a great opportunity to work as an AWS cloud engineer. Throughout my internship (3 months) learned about the usages of AWS services.
- Utilized Cloud Academy and Udemy platforms to deepen knowledge of AWS services, including EC2, S3, RDS, IAM, CloudFront and CloudFormation.

SKILLS

- **Industry Software Skills:** Flutter, Git, AWS.
- **Programming Languages**: Dart, Java, HTML5, CSS3.

PROJECTS

RevoRacers (Domain: Flutter | State Management: BLoC)

A competitive car racing tournament platform consisting of two separate applications: **Organizer App (Admin Panel)** and **Player App (Public App)**, designed to manage and participate in racing tournaments seamlessly.

Organizer App (Admin Panel):

- Developed tournament creation and management module.
- Built fixture generation and scheduling system for car racing tournaments.

- Implemented Registration Dashboard to approve/reject players or teams registering for tournaments.
- Designed structured admin workflows for smooth tournament execution.
- Applied BLoC architecture for scalable and maintainable state management.

Player App (Public Application):

- Developed Team Management System including:
    - Join team flow
    - Accept/Reject player invites (Team Owner role)
    - Accept team invitations (Player role)
- Implemented Language Selector with localization support for dynamic multi-language switching.
- Built Player Profile module (Get & Update profile).
- Developed Leaderboard, Points & Stats display module.
- Implemented Fixtures section to show upcoming and completed matches.
- Built Team Messaging section (Gmail-style UI) for internal team communication.
- Integrated Flutter app with Unity-based game engine for real-time tournament connectivity.

P3 Reporting Tool (Domain: Flutter | State Management: BLoC)

- A powerful reporting and template creation tool, similar to **Microsoft Word and Excel**, used for building dynamic documents.
- Built advanced components to map **text, images, links, dates, and tables** from a right-side property panel into the main document area.
- Developed logic to perform **arithmetic calculations** (addition, subtraction, multiplication, division) on **table rows and columns**, ensuring accurate data updates in real-time.
- Used the **BLoC pattern** for efficient and scalable state management, improving app structure and maintainability.

RG Workspace (Domain: Flutter | State Management: setState)

- An employee work management application that allows users to apply for leaves, request permissions, and manage tasks (Add/Edit/Delete/View).
- Focused on building the Leave Management Module, which includes features for employees to apply for leaves, view leave status, and for admins or leads to approve, reject, edit, or delete leave requests.
- Implemented responsive UI components using Flutter and ensured smooth data handling with clean form validation and user feedback.
- Integrated RESTful APIs to handle leave data submission, retrieval, and status updates.

Endraw (Domain: Flutter)

- A design application inspired by **Canva**, tailored for creating digital templates with an admin panel to manage content.
- Designed and implemented UI for **Authentication screens** including **Login**, **Forgot Password**, and **Sign Up**, integrating with backend APIs for seamless user access.
- In the **Admin Panel**, developed key modules for managing **Templates** and **Categories**, including functionalities to **Add**, **Edit**, **Delete**, and **Fetch** data.
- Ensured UI consistency and usability across multiple screens using Flutter's widget-based architecture.

AppStudio (Domain: Flutter | State Management: BLoC)

- A project and template creation tool supporting both traditional and "Express Builder" workflows. *(Currently in development)*

- Contributed to the **My Projects** module, implementing features to **Add**, **Edit**, **Delete**, and **List Projects**, using **Drift DB** (a local database) for offline storage and data persistence.
- Worked on the **Express Builder**, a guided project creation flow involving **project type selection**, **template listing**, and **page selection**, enhancing the overall onboarding experience.
- Applied **BLoC architecture** to manage complex UI states and asynchronous operations for a responsive and scalable app experience.

EDUCATION

RMK College of Engineering and Technology | Chennai **Aug '19 – Apr '23**

Bachelor of Engineering (B.E), Computer Science and Engineering

CGPA: 8.61

Velammal Matriculation Higher Secondary School | Chennai

12th **Mar'18 – Mar'19**

Percentage: 79.83

Sri Ram Dayal Khemka Vivekananda Vidyalaya Junior College | Chennai

10th **Mar'16 – Mar'17**

CGPA: 9.2

CERTIFICATIONS/TRAINING

- Completed AWS Certified Solutions Architect - Associate (SAA-C03).

I hereby declare that all the above details given by me are true to the best of my knowledge & belief.

Date: 22.02.2026 Saran M K
